

GE/NMF PRIMARY CARE LEADERSHIP PROGRAM: SUMMER 2012

Application Deadline: March 15, 2012

The GE Foundation and NMF are pleased to announce a new Primary Care Leadership Program (PCLP) that will provide future primary care healthcare professionals a valuable opportunity to examine the challenges and rewards of primary care practice in community health centers across the US. This program enhances traditional clinical externships with an element of leadership training and network building. The overall mission of the PCLP is to develop a pipeline of future primary care professionals and to build capacity at community health centers.

The innovative PCLP scholarship program will provide a service-learning opportunity of 200 hours (5 – 6 weeks, summer 2012) at community health centers in **Los Angeles CA, Phoenix AZ, Memphis & Nashville TN, or Jackson MS**. The GE/NMF scholars will be actively engaged in healthcare services, leadership training, and institutional project activities relevant to both academic programs and host sites, and will participate in a network of organizations and individuals from academic institutions, NMF alumni and program advisors.

Eligibility and Selection Criteria:

GE/NMF scholars must be enrolled in an accredited training program for one of these professions:

- **Medicine (2nd and 3rd year medical students)**
- **Nursing (RN/BS, Nurse Practitioner, Nurse Midwife): Phoenix AZ & Jackson MS placements only**
- **Health Sciences (Physician Assistant): Phoenix AZ & Jackson MS placements only**

Scholarships will be awarded in 2012 to **30 medical students and 8 nursing or health sciences students** with a stipend that is expected to cover travel, living and lodging expenses.

In addition to students who can apply, nominations are also invited from academic advisors. Each completed application must be accompanied by

- A letter of nomination that explains the candidate's academic and leadership accomplishments
- An official academic transcript, including financial aid information
- Curriculum vitae and biosketch
- A personal essay in which the student discusses motivation to serve underserved communities and commitment to primary care or public health

Applicants are ranked by a regional advisory board and the National Advisory Committee on the basis of the personal statement, academic achievements, leadership potential, and recommendations.

Applicants should specify preference as to summer placement location with a proposed project and commitment to complete program requirements between May 15 and August 30, 2012.

Apply online! www.nmfonline.org. For more information please email us at pclpinfo@nmfonline.org.

About the GE Foundation

The GE Foundation, the philanthropic organization of the General Electric Company, works to solve some of the world's most difficult problems. In coordination with its partners, it supports U.S. and international education, developing health globally, the environment, public policy, human rights and disaster relief. In addition, the GE Foundation supports GE employee and retiree giving and involvement in GE communities around the world. In 2010, the entire GE family — including businesses, employees, retirees and GE Foundation — contributed approximately \$260 million to community and educational programs, including approximately \$115 million from GE Foundation. About National Medical Fellowships

National Medical Fellowships, Inc. (NMF), was established in Chicago in 1946 to address the racial barriers that prevented minorities, particularly African Americans, from attending medical school. During the 1940's and 1950's, the challenge was to address financial obstacles; and over the following decades, as broad social changes swept America, NMF grew in scope by disseminating grants and awards on a national basis. As of 2011, \$40 million in scholarship support has been provided to 30,000 students. NMF remains the only nonprofit solely dedicated to changing the face of medicine and increasing the number of health professionals who can provide culturally and linguistically appropriate quality healthcare. NMF has three major programs: need-based scholarships for first and second year students; experience opportunities for more senior students, and information for the public and thought-leaders about the critical importance that minority physicians play on improving access to healthcare services for all. For more information, visit www.nmfonline.org.
