DMC
Program Overview
A panel of national and international experts will present the most recent, cutting edge information on different topics regarding antithrombotic therapy. The focus will be on advanced knowledge in basic sciences, clinical advances, controversies, and clinical pearls and application of antithrombotic therapy. Space is limited so early registration is encouraged.

Target Audience
Physicians in Primary Care, Internal Medicine, Family Practice, Hematology, Pulmonary Medicine and Cardiology, Nurses, Pharmacists, PA-C and other healthcare professionals caring for anticoagulation patients.

Educational Objectives
After participating in this conference, attendees will be able to
• Summarize the treatment options for Acute Coronary Syndrome and the role of antiplatelet therapy
• Outline the treatment options for venous embolic disease
• Discuss current anticoagulation bridging guidelines and recommendations
• Explain the reversal options for oral anticoagulation therapy
• Discuss the direct oral anticoagulation agents indications and dosing considerations
• Discuss the treatment options for acute stroke
• Summarize the prevention of stroke in special population atrial fibrillation patients
• Apply antithrombotic therapeutic modalities based on information presentation
